Summary

I am a polyglot Software Engineer, with expertise in the JavaScript ecosystem. As a Team Lead my goal is to create highly efficient and autonomous teams, and to contribute to the shaping of an impactful roadmap. As an Individual Contributor my focus is to find and solve the most impactful technical challenges, by delivering well architected and scalable solutions, written with high quality, readable and testable code. I also have a strong background in UI/UX, and I am delighted to work in an Agile environment with teams and people from all over the world.

Work Experience

DAZN   *London, UK (remote)*
